Profile

Software Engineering graduate passionate about Information and Communication Technologies (ICT), currently seeking a 3-month internship to apply my web development skills, gain hands-on experience through real-world projects, and effectively contribute to the development of innovative solutions within your company.

Projects

E-MIAGE

Nov. 2025 – Present

Web application for managing the assignment of internships to supervisors, featuring a matching algorithm to optimize student allocation.

- Developed a secure REST API with JWT authentication and email-based password recovery.
- Implemented a multilingual interface (French/English) using internationalization (i18n).
- Automated internship status updates using scheduled tasks (Cron Jobs).
- Implemented a matching algorithm to optimize student assignments.

Technologies: React, Vite, Tailwind CSS, NestJS, Node.js, Prisma ORM, MySQL, Git

Maritime Management System (SGM)

May 2026 – Jul. 2026

Progressive Web App (PWA) designed to manage crew members, vessels, voyages, and contracts for a maritime company.

- Developed an offline-capable application using IndexedDB (Dexie.js).
- Implemented a licensing system based on a unique device identifier and encrypted license codes.
- Implemented automatic PDF document generation.
- Designed a modern and responsive interface.

Technologies: React, Vite, Tailwind CSS, Dexie.js, jsPDF, Git

Skoolink

May 2025 – Oct. 2025

Web application for managing the administrative activities of an educational institution.

- Implemented a complete CRUD system for managing students, teachers, subjects, courses, and timetables.
- Developed a profile photo upload system for users.
- Implemented administrator-only authentication.
- Enabled fully offline operation through local data storage.

Technologies: React, Tailwind CSS, Node.js, Sequelize ORM, MySQL, Git

AirCoop Manager

Sept. 2024 – Oct. 2024

Web-based flight booking application developed as part of a university team project.

- Implemented session-based authentication with role management for administrators and customers.
- Implemented real-time booking management to prevent seat availability conflicts.
- Implemented password encryption for users.
- Enabled public flight browsing, with booking available after authentication.

Technologies: HTML5, CSS3, Bootstrap, JavaScript (jQuery, AJAX), PHP, Apache, MySQL

Education

BACHELOR'S DEGREE IN SOFTWARE ENGINEERING

2022 – 2025

E-media University of Madagascar

SCIENTIFIC BACCALAUREATE

2020 – 2021

Independent Candidate

JUNIOR SECONDARY SCHOOL CERTIFICATE

2019 – 2020

La Victoire Private High School

❖ Distinction: Laureate

Technical skills

Programming languages: [JavaScript](#), Typescript

Frontend: [HTML5](#), [CSS3](#), React, TailwindCSS

Backend: Node.js, NestJS, Express.js

Databases & ORM: MySQL, PostgreSQL, SQLite, Prisma ORM, Sequelize

Tools & Versioning: Git, GitHub, GitLab, Postman

Soft skills

- ❖ Analytical thinking and problem solving
- ❖ Ability to learn quickly
- ❖ Teamwork

Languages

- ❖ Malagasy - Native
- ❖ English - Upper intermediate
- ❖ French - Upper intermediate

Interests

- ❖ Learning Chinese
- ❖ Basketball
- ❖ Playing the piano
