

Samson Johannès TAHINIAVO

FULL STACK WEB DEVELOPER | JAVASCRIPT / TYPESCRIPT

Profile

Software Engineering student focused on full stack web development, proficient in JavaScript, TypeScript, React, Node.js, Prisma and MySQL. I have worked on applications featuring secure REST APIs, JWT authentication, internationalization (i18n) and offline functionality. Motivated by building high-performing and maintainable web solutions, I am looking for a 3-month internship to contribute to real-world projects and strengthen my technical experience.

Education

BACHELOR'S DEGREE IN SOFTWARE ENGINEERING, E-media University Madagascar

2022 — 2025

BACCALAURÉAT SCIENCE SERIES (S) OPTION C, Independent Candidate

2020 — 2021

JUNIOR SECONDARY CERTIFICATE (BEPC) OPTION A, La Victoire Private High School

2019 — 2020

Distinction: Laureate

Projects

E-MIAGE

NOV 2025 — PRESENT

Development of a secure REST API with JWT authentication and password recovery by e-mail. Setup of a multilingual interface (French/English) through internationalization (i18n). Automation of internship status updates using scheduled tasks (Cron Jobs). Implementation of a matching algorithm to optimize student placement.

Technologies: React, Vite, TailwindCSS, NestJS, Node.js, PrismaORM, MySQL, Git

Maritime Management System (SGM)

MAY 2026 — JUL 2026

Development of an offline-capable application using IndexedDB (Dexie.js). Setup of a licensing system based on a unique device identifier and encrypted codes. Automatic generation of PDF documents. Design of a modern and responsive interface.

Technologies: React, Vite, TailwindCSS, Dexie.js, jsPDF, Git

Skoolink

MAY 2025 — OCT 2025

Implementation of a complete CRUD system for managing students, teachers, subjects, courses and timetables. Development of a profile photo upload system for users. Administrator-only authentication. Fully offline operation thanks to local data storage.

Technologies: React, TailwindCSS, Node.js, Sequelize, MySQL, Git
